Sterile Surgical Draping Facts

QUALITY

Based on the experience and skills established over the years, our partners have developed a range of materials that not only meets but exceeds the regulatory standards of EN13795, EN866-2 and ISO 11607-1, thereby ensuring the highest level of protection to patients and surgical teams. Testing is undertaken for the full range of products. Their market leading performance is confirmed by the testing of absorbency, spread and run off.

MATERIAL TYPES AND FEATURES

Different Procedures require different levels of protection. Therefore, we offer a choice of fabric and reinforcements. All our fabrics are latex free.

COMPLIANCE

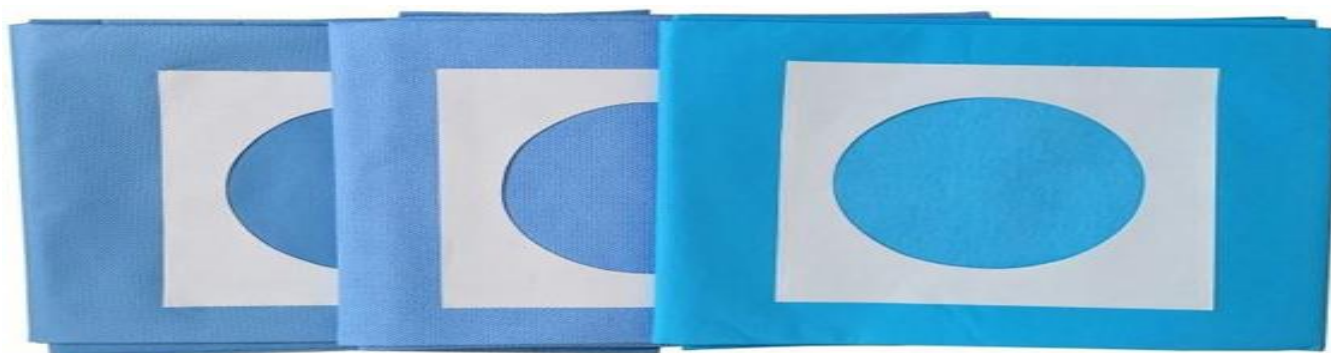

Their products are CE marked in accordance with the medical Device Directive 93/42/EEC.

Their Plants are Certified to:ISO9001, ISO13485 and Directive 93/42/EEC

Their products are certified to:ISO9001, ISO 13485 and Directive 93/42/EE

MATERIAL PROPERTIES

1. Use with steam and EO sterilization. Each packaged product is clearly labeled and identified for its sterilization status.
2. Comply with EN13795/2011 and YY0506:2009 standards.
3. Comply with ANSI/AAMI PN70:2003 standards-Liquid barrier performance and classification of protective apparel and drapes intended for use in healthcare facilities.
4. The fabric has been thoroughly evaluated and test for biocompatibility and the fabric shows no toxicity and no skin irritation and does not cause any allergic reaction.
